

**BATTERY
RECYCLERS
OF AMERICA**
MAKING RECYCLING EASY

Power Sonic Recycling Process

Battery Recyclers of America is providing a nationwide recycling service to all Power Sonic Distributor locations and customers. The program will cover lead acid and lithium iron phosphate batteries. The program is meant to provide aggressive and affordable pricing for the recycling of battery materials, in an EPA approved manner, in the simplest and easiest way possible.

Making A Pickup Request

Minimum Pickup Requirements

1 pallet > 1500 lb
of Lead Acid
batteries

1 pallet > 1000 lb
of Lithium Iron Phosphate
batteries

Email or call us directly at the addresses below once you have accumulated the minimum shipping volume.

Please include the number of pallets you have ready, a short description of what you have as well as the address of the batteries.*

We will provide you with all applicable shipping documents and we will pick up within 2 business days, but often much sooner.

Let us know if you have any questions at all, we are here to help!

* Please advise us if any contact or address information has changed.
